Dear Valued Customer,

As the leader in temporary heating solutions, United Rentals offers safe and efficient propane and natural gas heating solutions for your project. Our scope encompasses everything from commercial, industrial, agricultural and residential projects.

Our dedicated and experienced team of salespeople, administrative staff, journeymen & apprentice gasfitters will consult, deliver, install, and maintain all of our heating systems from start to finish. With a primary focus on safety, you can be assured the heating equipment will be installed and maintained to the highest level, meeting all code requirements and exceeding safety standards. Combined with our large fleet of modern propane delivery vehicles and professional drivers we can ensure that your needs are met on time and on budget.

We are proud to be a full service solution for all of your propane and natural gas temporary heating requirements. Our commitment to maximizing productivity while maintaining a healthy bottom line will take the stress of construction heating off of your mind.

Thank you for choosing United Rentals as your project partner.

Best Regards,

A handwritten signature in black ink, appearing to read "Michael A. Huesing", with a long horizontal flourish extending to the right.

Michael A. Huesing, Area General Manager

Industry Experts

Advantages

The work you do is important, fast-paced, and happens in many places. Having the support you need available and nearby your project has a major impact on your success. United Rentals commits to providing you with the safest and most reliable equipment while utilizing cost effective and efficient heating solutions. We offer the highest level of service in the industry and will follow through on every order and service on time. We are always accountable to you, our valued customer.

» United Rentals Advantages «

Fleet

- Modern propane delivery trucks
- Dedicated equipment delivery and service trucks
- Propane cylinders and tanks ranging from 20lb cylinders to 2000 gallon skidded tanks
- Construction heaters from 80,000BTU to 1,500,000BTU's

Safety Training & Reporting

- COR certified
- Safety training available
- PTI courses available through United Rentals
- Specialized in-house training to ensure competency and efficiency
- Meet and exceed Municipality requirements and work with their staff to ensure utmost compliance
- Comply with all site specific safety programs and initiatives
- Adhere to B149 Gas Code

Dedicated Team

- Full time and seasonal heating staff
- Class A Journeyman and apprentice Gasfitters
- Dedicated management, administrative, dispatch and consulting staff

Around the Clock Service

- 24/7 Emergency equipment service
- 24/7 Propane fuelling service
- 24/7 Technician availability/phone service - Direct contact with on call technician through our call center

Industry Experts

Capabilities

We pride ourselves on handling any job, big or small, with precision and promptness. With one of the largest fleets of heating equipment, you can be confident we will have what you need, when you need it. Our combination of dedicated delivery vehicles, service vehicles, and a team of expertly trained staff, will have your heating system up and running on time. Our crews will satisfy any heating requirements from single family homes, agricultural jobs, commercial builds, bridges, high rises and industrial work including refinery projects. Our team is equipped to handle any and all heating requirements.

Service

- We provide free custom consultations when you are ready to start planning your heating project. An experienced member of our team will visit your jobsite and help you find an effective solution to your heating needs. Our consultant will advise on all aspects of the scope of work including heating system options, budget, and safety.
- We offer start-to-finish delivery, installation, teardown, and pick up of all heating equipment.
- All tanks and heating equipment will be hooked up and maintained by one of our qualified gasfitters or gasfitter apprentices.
- We pull all temporary gas permits and work with the Municipalities to schedule and pass temporary heating gas inspections.
- We offer 24/7, 365 on call service with priority given to service calls on existing heating systems.

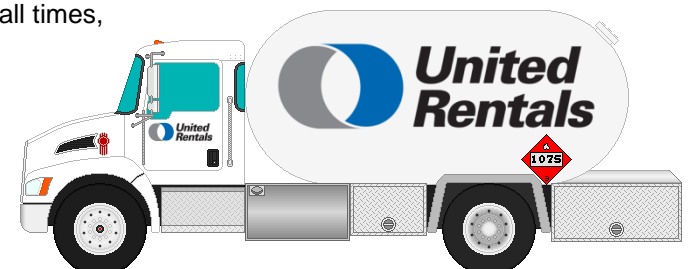

Certified Journeyman

Excellence through training and experience

Propane

- We provide a full scale propane delivery service for all site requirements including jobsite trailers, construction heating, and permanent applications.
- Our full service propane fueling program is monitored by United Rentals Heating and Propane staff at all times, ensuring on time deliveries, zero outages and peace of mind for site personnel.

Heat & Fuel

Customer Focus and Flexibility

At United Rentals Heating & Propane, our goal is to make it easier for our customers to focus on finishing their projects on time and on budget. We offer many pricing options for both our propane fuel delivery and equipment rentals to help you properly budget your project. We know the bottom line is important to the success of your build.

Some of the options available to you:

- Competitive rental and service rates on heating programs and propane service.
- Seasonal and packaged rental rates.
- “UR Control” allows you to access your account that details important rental information, assisting in tracking and control of equipment costs.
- Competitive new and used equipment sales.
- Locked in pricing for seasonal propane volumes to mitigate risk, save money and assist in budgeting.

Our administrative staff will work with your team to ensure our invoices are delivered in a timely and accurate manner. We hold ourselves accountable to ensure understanding and transparency in our invoicing, with our goal to enhance business relationships based on a foundation of trust and confidence. We pride ourselves in our ability to serve our customers at the highest level.

Propane Tank Monitoring System

Tank monitors and monitoring service are included at no charge for 500 gallon and larger propane tanks. United Rentals will maintain and monitor all tanks to ensure efficiency and zero outages. Our tank monitoring program communicates with UR Control to offer customer visibility on all propane systems.

Features

- Self-powered fleet monitoring
- GPS location tracking
- Reports sent 3 times per day
- Intrinsically safe monitoring of tank levels
- Rapid/Quick/Easy installation

Communication

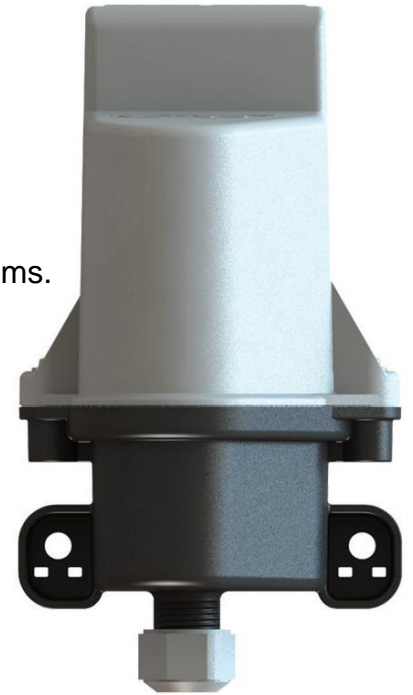

- 50 Channel GPS (with SBAS)
- Internal cellular and GPS antennas

Environmental

- -30C to + 60C (operating)
- Sealed and rugged enclosure

Electrical

- Self-powered with lithium ion battery pack
- Battery capacity of 19 Ah

Heat & Fuel

Environmental Impact / Propane Benefits

Propane is a low carbon and clean-burning energy source that contains virtually no sulphur or air pollutants (Acid Rain), it is a smart environmental choice when it comes to emissions.

Propane is not considered a greenhouse gas; it emits minimal soot and low hydrogen & oxides of nitrogen (Smog).

In the unlikely event of a leak, propane becomes a vapour that does not contaminate the soil, air or aquifers, unlike liquid fuels.

Propane emits 60% less carbon monoxide (CO) than gasoline and 98% less particulate matter than diesel. Burning propane also produces lower levels of air toxins than either gasoline or diesel.

Compared to using other fuels, the utilization of propane will help to improve air quality, reduce greenhouse gas emissions and protect the environment

Propane is a safe, reliable, cost effective and environmentally friendly alternative to diesel and gasoline.

Electric Heaters

PATRON E1.5

Cat Class	250-3429
BTU	5,100
Power	115V/15amp
Max Amp Draw	12.5 amp
CFM	116
Weight	13.7 lbs

FEATURES:

- For heating, drying, and ventilating
- Integrated ambient thermostat from 32°F – 100°F
- Overheat protection at 104°F
- Durable steel casing with powder coating
- Stainless jacketed heating coils
- Fast, high temperature rise with uni-directional fan
- User-friendly and proven reliability

PATRON E6

Cat Class	250-3405
BTU	20,500
Power	230V/30amp
Max Amp Draw	25 amp
CFM	250
Weight	32.9 lbs

FEATURES:

- For heating, drying, and ventilating
- Integrated ambient thermostat from 32°F – 100°F
- Overheat protection at 104°F
- Durable steel casing with powder coating
- Stainless jacketed heating coils
- Fast, high temperature rise with uni-directional fan
- User-friendly and proven reliability
- Works on 208V

BELLY PAD ELECTRIC HEATER

Cat Class	250-3535
BTU	1,600
Power	115V/15amp
Max Amp Draw	25 amp
CFM	N/A
Weight	5 lbs

FEATURES:

- Solves the problem of low propane pressure during cold weather by increasing the vapor pressure in tanks.
- A rigid, outer shell insulates the heater and protects it from the elements.
- A built-in thermostat shuts off power to the POLARPAD when the air temperature is warmer than -10°C.

DRYHEAT 80K HEAT EXCHANGE

Cat/Class	250-6950
Supply Fluid	Glycol
BTU	80,000
Power Requirements	120V single phase
Max Amp Draw	3.7 A
CFM	900
Weight	90 LBS
Dimensions	23"L x 14W x 34"H

DRYHEAT 200K HEAT EXCHANGER

Cat/Class	250-6955
Supply Fluid	Glycol
BTU	200,000
Power Requirements	120V single phase
Max Amp Draw	12.7 Amps
CFM	2,300
Weight	210 LBS
Dimensions	32"W x 50"L x 39"H

DRYHEAT 600K HEAT EXCHANGER

Cat/Class	250-6960
Supply Fluid	Glycol
BTU	600,000
Power Requirements	120V single phase
Max Amp Draw	12.7 Amps
CFM	5000
Weight	560 LBS
Dimensions	45"W x 81"L x 52"H

Fans

SUREFLAME 20" FAN

Cat Class	250-2166
CFM	5000
Power	115V/15amp
Max Amp Draw	7.2 amp
Weight	70 lbs

FEATURES:

- Light weight and portable design with handles for easy one-person relocation
- Stackable for quick and easy transportation and storage
- Rugged construction design with powder coated shell for high impact resistance
- Rigid mount motor to withstand job site demands

SUREFLAME 42" FAN

Cat Class	250-2200
CFM	14000
Power	115V/15amp
Max Amp Draw	9 amp
Weight	210 lbs

FEATURES:

- Rugged construction design with powder coated shell for high impact resistance
- Lifting Hooks for relocation
- 8" Semi pneumatic wheels
- Seven different air flow directional settings
- Low amp motor reduces energy draw
- Designed for quieter operation

The Best People, Equipment and Solutions in the Industry.

No Time for Downtime

United Rentals provides the world's largest fleet of rental equipment to industrial operations and commercial construction companies, as well as public and private works. With branch locations throughout North America, we offer our customers true 24/7 service and support, including a dedicated customer care team and on-site maintenance and repair day or night, to keep rental equipment and plants/jobsites up and running.

Specialized Equipment and Services

Trench Safety experts deliver underground construction safety equipment and excavation solutions. The Power & HVAC team provides temporary power, climate control, disaster recovery and related equipment and services. Pump Solutions provides industrial-grade equipment for fluid transfer, flow control, bypass and groundwater management applications. And our Tool Solutions range from a single tool to a completely customized mobile tool room and tracking system.

Innovative Technology Solutions

Beyond equipment, we offer customers advanced tools that streamline the rental process and help maximize wrench time, boost productivity and lower costs. Total Control,[®] our innovative web-based fleet management system, helps decrease equipment consumption, maximize utilization and drive efficiencies through a proactive, exception based management process. The UR Control[™] rental management platform provides online access to account details and rental information, providing real-time visibility and access to all of your rented equipment. The UR Jobsite Mobile App provides rental management on the job or on the go through a tool that's right in your pocket and ready when you need it.
